OVERVIEW

OUR COMMITMENT

our commitment to success goes beyond safety, quality, and punctuality. We are dedicated to achieving environmental sustainability and upholding social responsibilities. These values drive us forward

We are targeting 100% safe hours during construction

Zero defects at handover

100% On time delivery

VALUES

VISION

We're here to provide sustainable solutions, covering everything from straightforward designs to complex installations, and even ongoing maintenance. Our Vision? To be the leading, trusted name in MEP services throughout the MENA Region, with a strong focus on top-notch installation expertise

MISSION

We consistently deliver sustainable MEP solutions and construction services swiftly, prioritizing safety and quality to meet local and international standards. Our mission is to provide peace of mind and satisfaction to clients while enhancing production efficiency and ensuring comfort, well-being, and safety for end-users.

COLLABORATION

Energetic C.C places significant emphasis on its stakeholders, encompassing investors, clients, and specialized suppliers. Our commitment to building enduring relationships with these key partners is integral to our success. Clients are at the core of our operations, and we collaborate closely with a network of specialized suppliers to ensure the highest quality products and services.

A nighttime cityscape with illuminated buildings and streets, viewed from an elevated perspective. A large white diagonal shape covers the left and bottom portions of the image, creating a modern, minimalist aesthetic.

SCOPE...

1 MEP CONSTRUCTION

With more than a decade of growth, Energetic C.C specializes in installation, commissioning, and maintenance for various systems in Jordan. We offer in-house engineering and construction services, known for quality, timeliness, safety, and cost-effective solutions, earning trust from customers and collaborators.

2 DESIGN AND VALUE ENGINEERING

Energetic C.C excels in design services across various phases, from conceptual design to construction drawings. Our expert professionals deliver innovative ideas and value engineering for cost efficiency. We streamline permit processing and reviews, aligning with local and international standards, and excel in BIM Modeling coordination to benefit contractors, partners, and owners.

3 MAINTENANCE

Energetic C.C, driven by our commitment to excellence, offers preventive and reparative maintenance services conducted by trained engineers. Our goal is to ensure the continuous maximum efficiency of systems, maintaining high standards and reliability.

services where requested

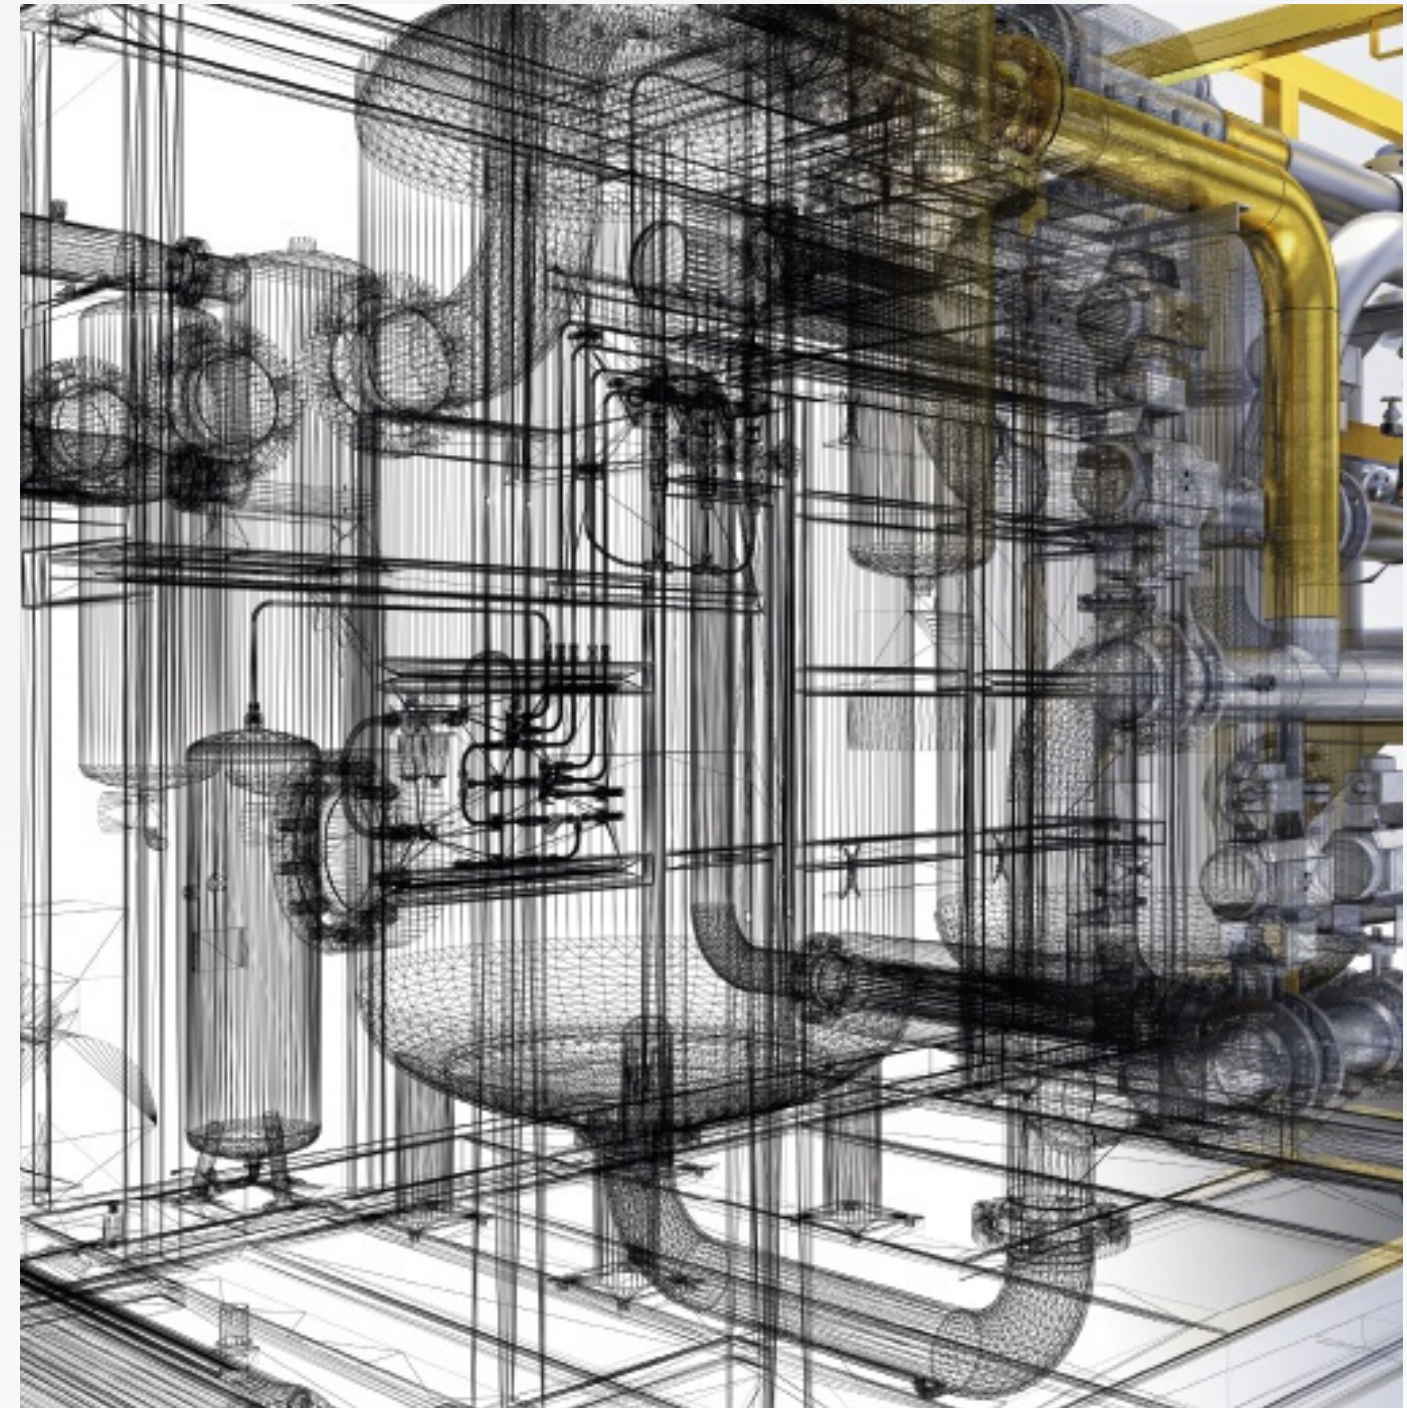

DESIGN & ENGINEERING

Design & Value Engineering

Energetic C.C delivers turnkey solutions through our experienced engineers and project managers. We collaborate closely with partner design offices to streamline the design and build process, reducing project timelines. Our designs adhere to global standards and client visions. Sustainability is paramount, driving us to innovate and collaborate with specialized design offices.

Building Information Modeling (BIM) & Conventional Methods

At Energetic C.C, we have strategically partnered with a specialized company to address our BIM and design requirements. This collaborative effort enables us to offer top-notch services in design and value engineering, utilizing both Building Information Modeling (BIM) and conventional 2D methods. Through this joint initiative, we proactively identify and resolve constructability issues before construction,

TRANSITION TO DIGITAL

Objectives

Switching from traditional paper-based methods to collaborative digital drawing platforms opens up a lot of possibilities for streamlining our workflows. Beyond simplifying the process of drawing and revisions, it facilitates the adoption of enhanced digital processes for tasks such as submittals, requests for information, change orders, and task management.

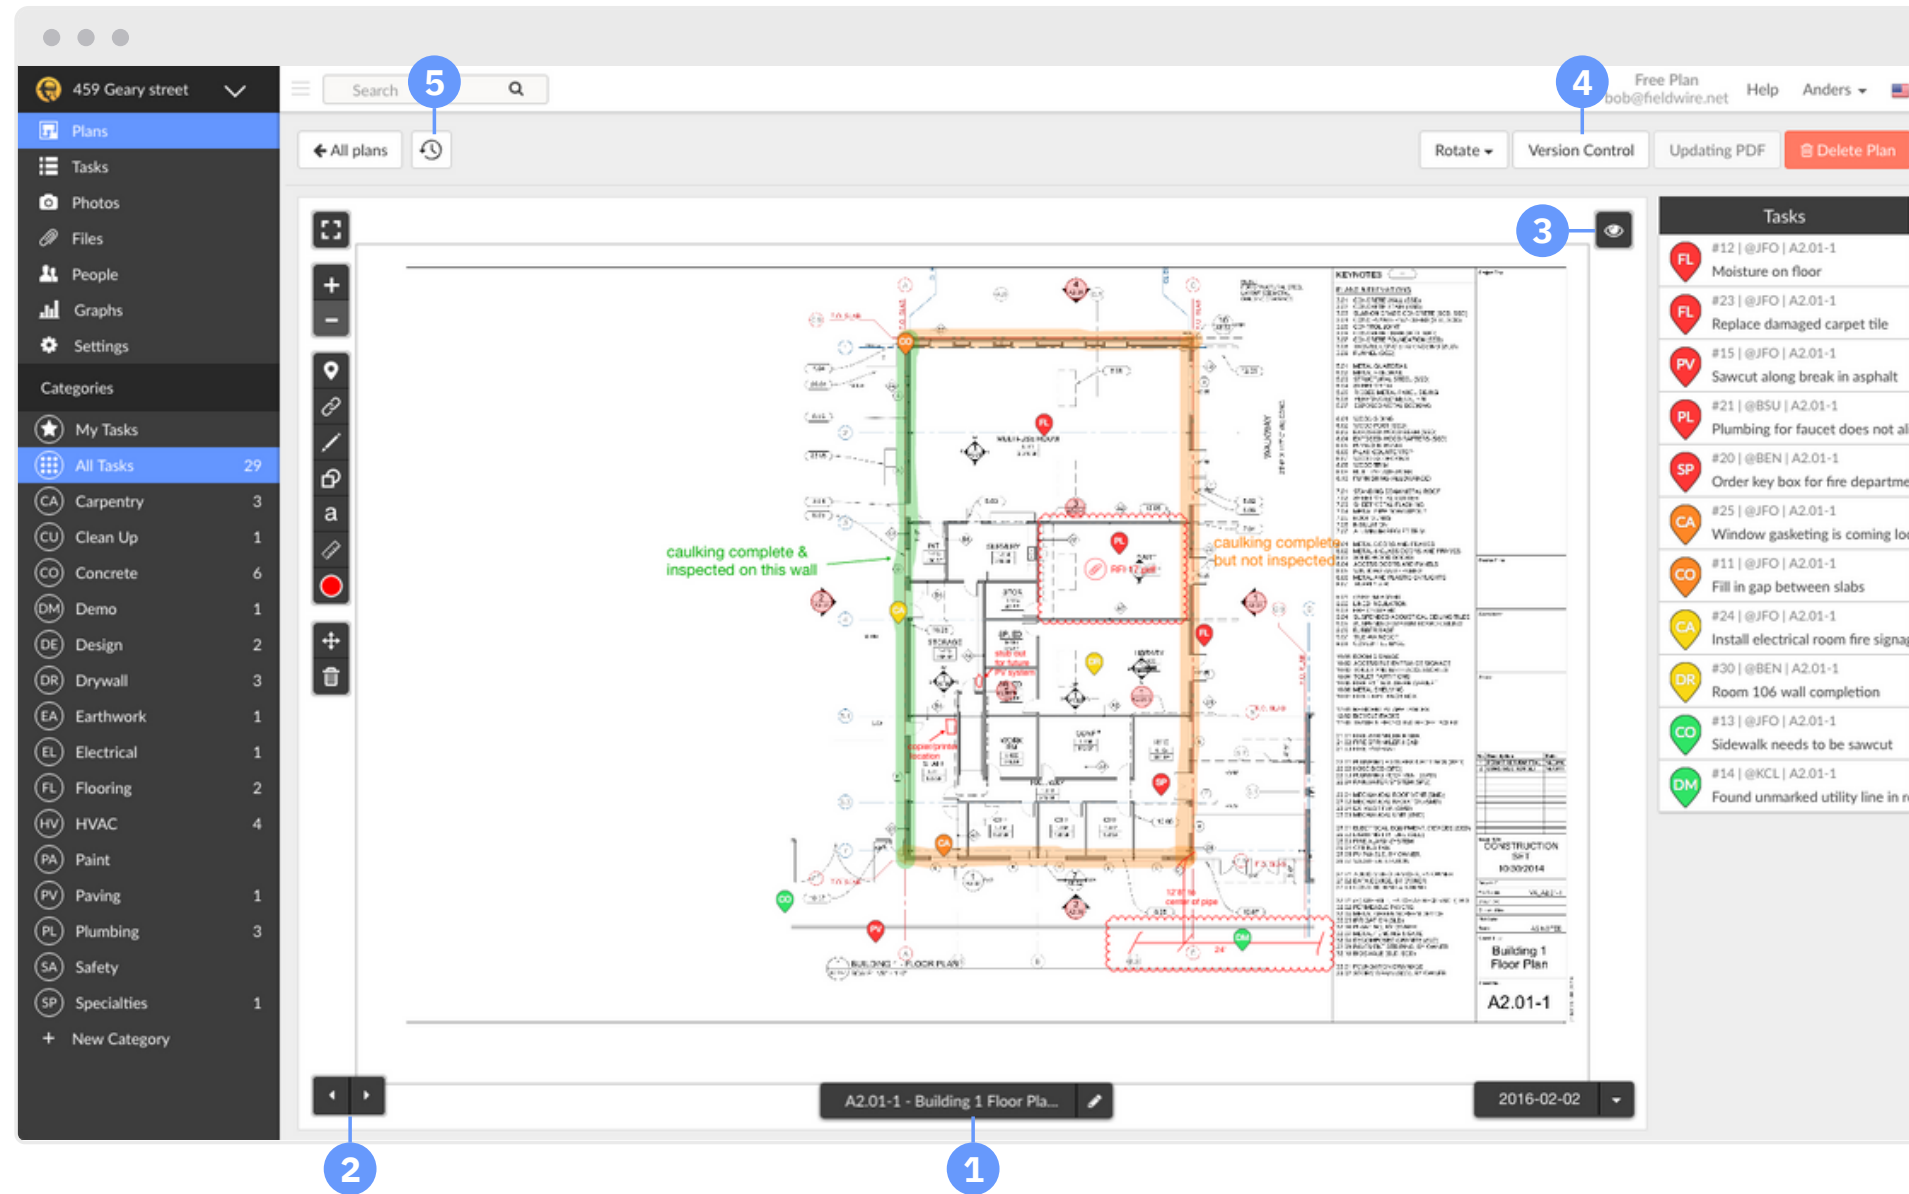

Fieldwire Construction and Field Management Software

Our main team has received internal training on the Fieldwire software for construction and field management, both on the web and mobile apps. Any new member will undergo an induction process to become part of the group responsible for managing projects through the software. It's worth mentioning that the software can organize the entire project workflow, involving all collaborative parties.
